

Florida Statute requires the Division of Motor Vehicles to license all installers of new and used manufactured homes. All installers, dealers and manufacturers are required to purchase installation decals from the Division of Motor Vehicles. The decal must be placed on the manufactured home prior to being approved for occupancy by the Building Inspection Division. The decal is required to be placed as follows:

- On all HUD approved homes the decal must be placed on the home next to the HUD label.
- On pre-HUD homes the decal must be placed on the lower left rear corner of the home.
- The decal shall denote the name of the installer, the license number of the installer, dealer or manufacturer, and the installation date of the home.

METER POLE LOCATION for CITY of TALLAHASSEE ELECTRIC CUSTOMERS

SETUP NOTES

- Tie Downs and Electrical Inspections must be approved prior to power being released to City Hall.
- Manufacturer's specifications must be on site when the tie down inspection is called in.
- Manufactured Home and Meter Base must be marked with lot number, being at least 3 inches, prior to electrical inspection being called in.
- Locate meter pole at same end of manufactured home as City power pole.
- No electrical wires are allowed across manufactured home.
- Stairs and Handrails must be installed prior to called for a building final.
